REVISED POLICY REGARDING FLAGS

An amendment to Section **D. Flags, Flag Holders and Flagpoles** of the Design Committee Rules shall read as follows:

D. Flags, Flag Holders and Flagpoles

This rule only applies to the flags of the **United States of America** and the **State of Hawai‘i**. No other flag will be approved for display in any area that is visible from any neighboring property.

A single, removable, United States or State of Hawai‘i flag flown on a holder mounted to the residence or support pillar shall not require Design Committee approval. All other flag installations require Design Committee approval.

The flag and any supporting device must be maintained in a neat, clean, and undamaged condition.

Residents shall take precautions to prevent the flag from flying outside the resident’s lot and from creating unreasonable noise.

Any light used to illuminate the flag must be suitably dimmed, screened, shaded, or diffracted to prevent light shining onto neighboring properties.

Any freestanding flagpole shall be securely anchored in the ground.

The flagpole and the flags permitted under this policy shall be erected and flown in accordance with all applicable City, County, State and Federal Regulations. In particular, the State of Hawai‘i flag’s design and condition shall comply with Hawai‘i Revised Statutes (“HRS”) §5-19 and §5-20.

Residents whose flags do not comply with this policy will be given a warning. If corrective action is not taken within the specified time in the warning notice, the Association may impose fines, remove the flag, or take other corrective action at the resident’s expense.

Approved by the Design Committee on November 13, 2025 and adopted by the Board of Directors on November 14, 2025. An update to the Design Rules is in progress and will include the revised language. The rule revision is active.
